

Safety in style.

A new lease of life for existing fire doors.

With new regulations, fire doors are under the spotlight but we can help you transform your doors at a fraction of the cost of buying new.

Save money & look good.

Stylish interior fire doors are more affordable than you think.

Regulations don't have to ruin the looks of your interior when it comes to fire doors. Transform your corridors and public spaces with architectural films, making fire doors considered, stylish and compliant for a fraction of the cost of a replacement.

With new regulations coming in putting extra scrutiny on fire doors there is a great opportunity to refresh and update your existing stock with a brand new look and finish.

Our architectural films offer a cost effective alternative to replacing tired looking fire doors and it's a quick and easy disruption free way of giving your public spaces a sleek new makeover. There are 100's of finishes to choose from and they meet all current and upcoming regulations.

Fire door refurb - at a glance.

It might only scratch the surface but for those of you who are in a rush we've put together some quick points on the benefits of using our architectural films. It's hard to sum up our life's work in a few words but we did try and there's icons and everything..

No fuss installation

Our process is mess-free and creates minimal disruption for a quick, hassle free installation.

Fire tested

Fire tested, CE marked and IMO approved for peace of mind.

Sustainable

Up-cycle existing fixtures and fittings to prevent unnecessary landfill.

100's of finishes

A staggering array of realistic patterns, textures, colours and finishes to choose from.

Saving you money

Giving your existing doors a new lease of life can save you up to 50% on the cost of buying new.

Hygienic

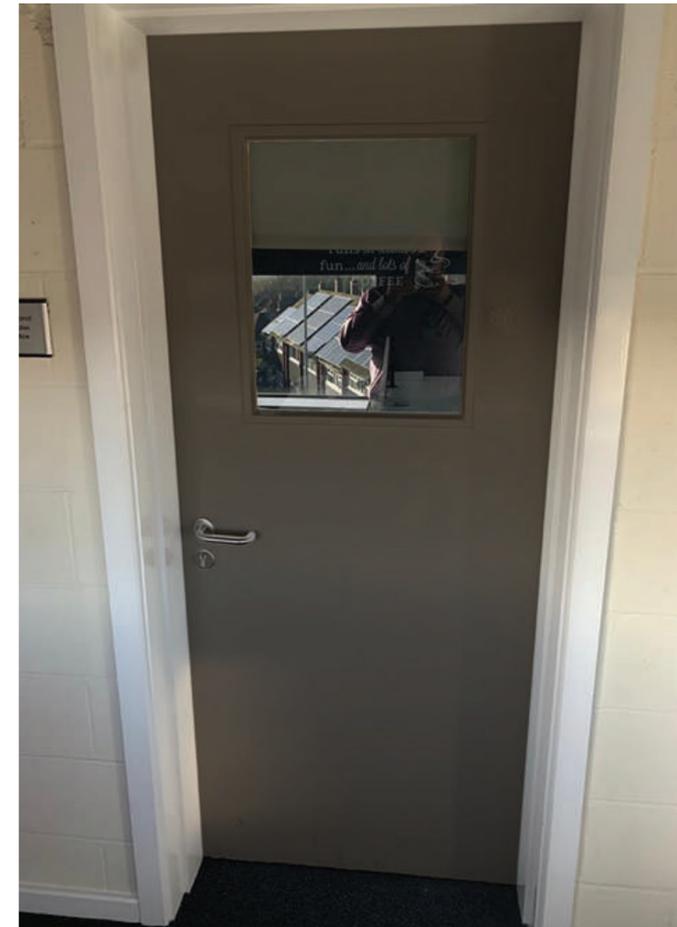

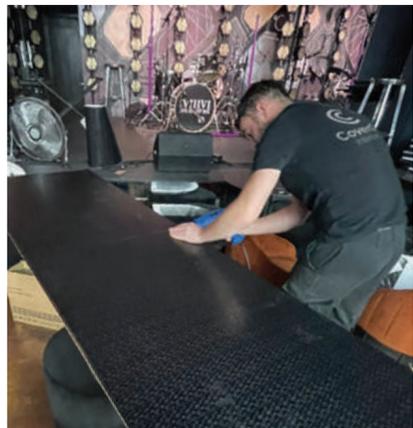

A tough durable exterior that is easy to clean and maintain for high traffic areas.

Keep reading to see the goods.

We've got a few of examples to show you what can be achieved with a little bit of imagination.

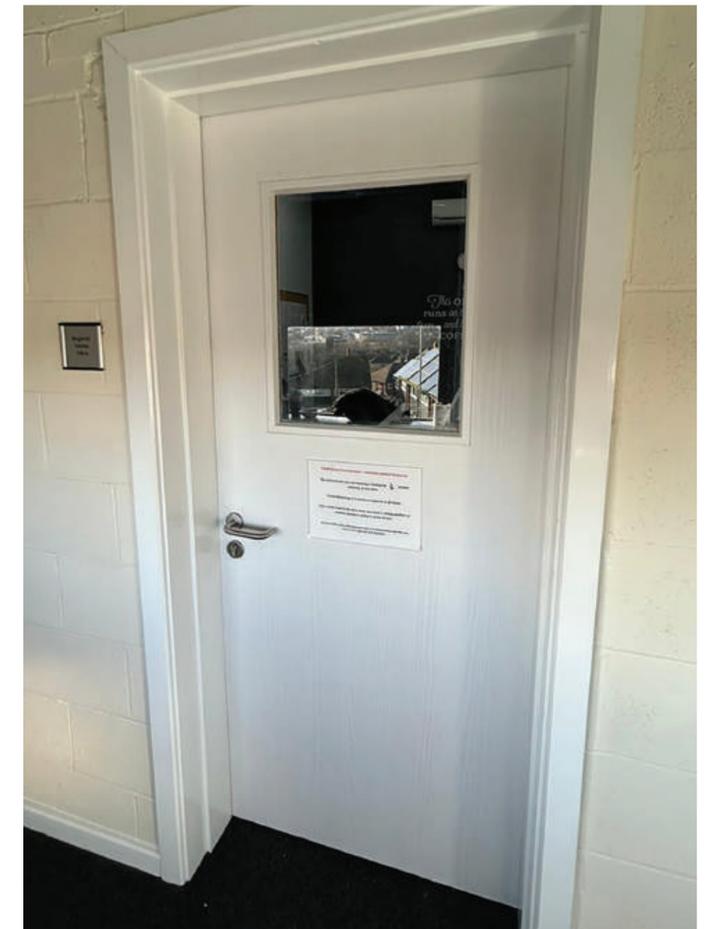

Something we made earlier.

Some of the work we've done for
a bunch of happy customers.

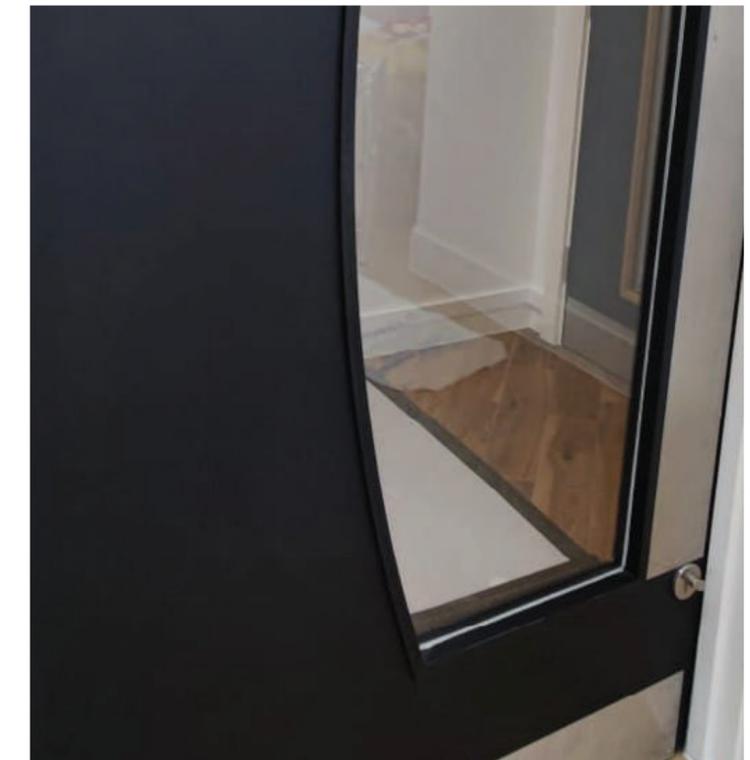

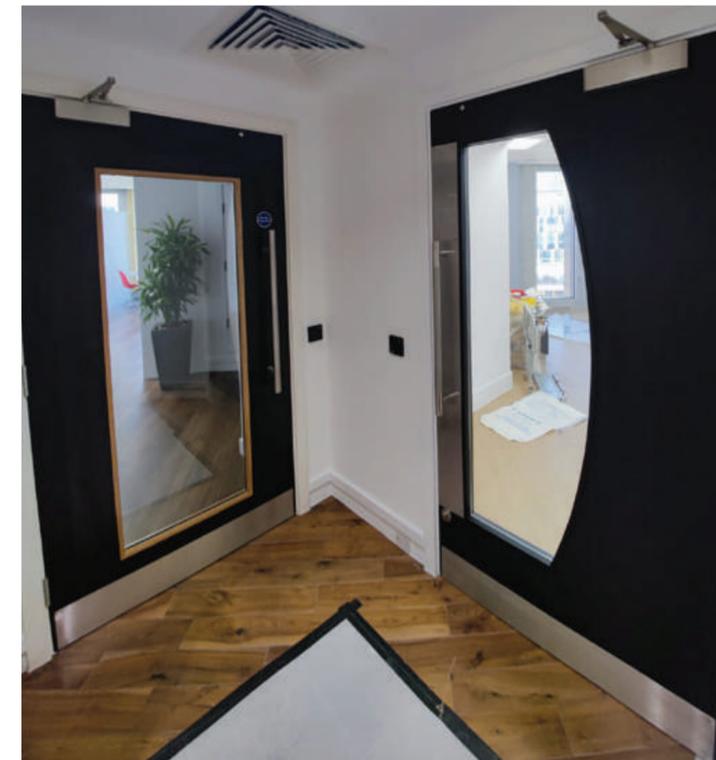

**From dull and grey
to fully fabulous.**

Take a plain looking door that's seen better days, add a half day of love and attention from our expert fitters with our gorgeous white wood textured finish and Voilà!

How about some amazing afters?

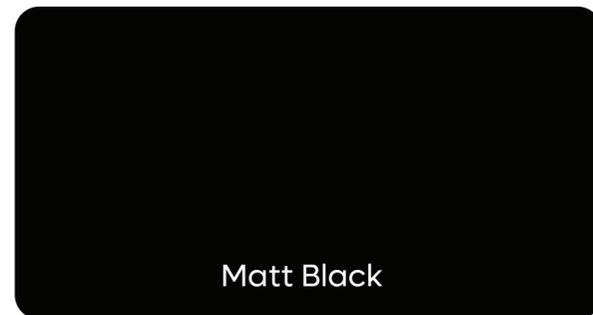

Take a look at a selection of doors with some lovely finishes and fine details.

Night and day or before and after.

A tired, plain and unloved fire door can be transformed at a fraction of the cost of a replacement. The results speak for themselves and the finish is almost indistinguishable from a brand new door.

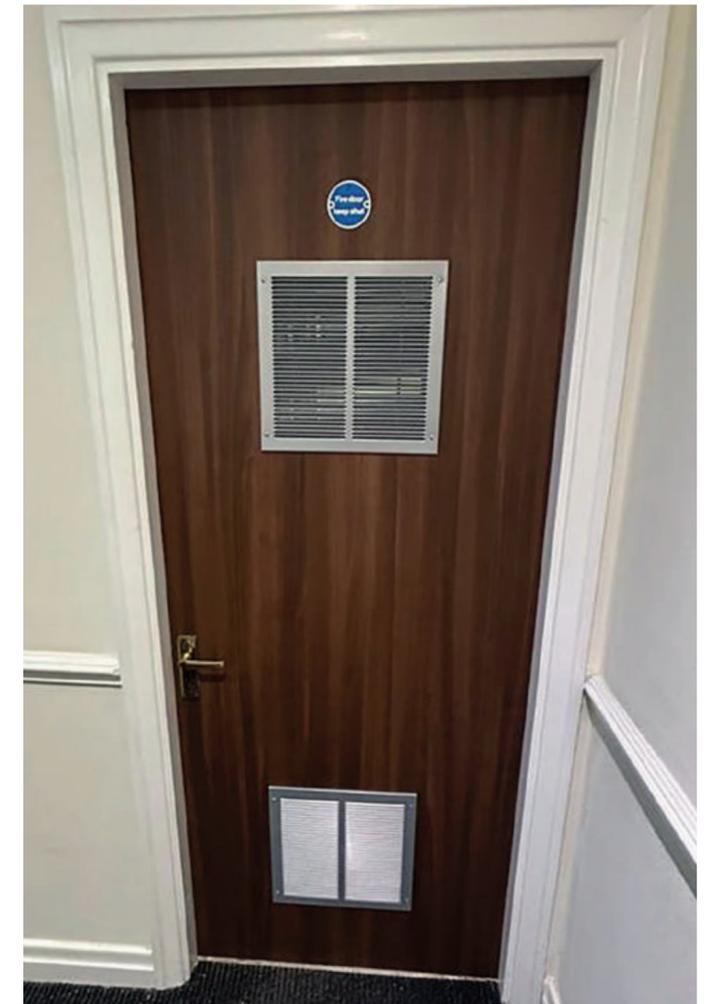

Walnut

A finish in every nook and cranny

Our materials are made to be flexible and mould to the door and our skilled fitters will remove fixtures and fittings prior to install for the perfect finish. As you can see below we'll even position your safety signs properly.

Walnut

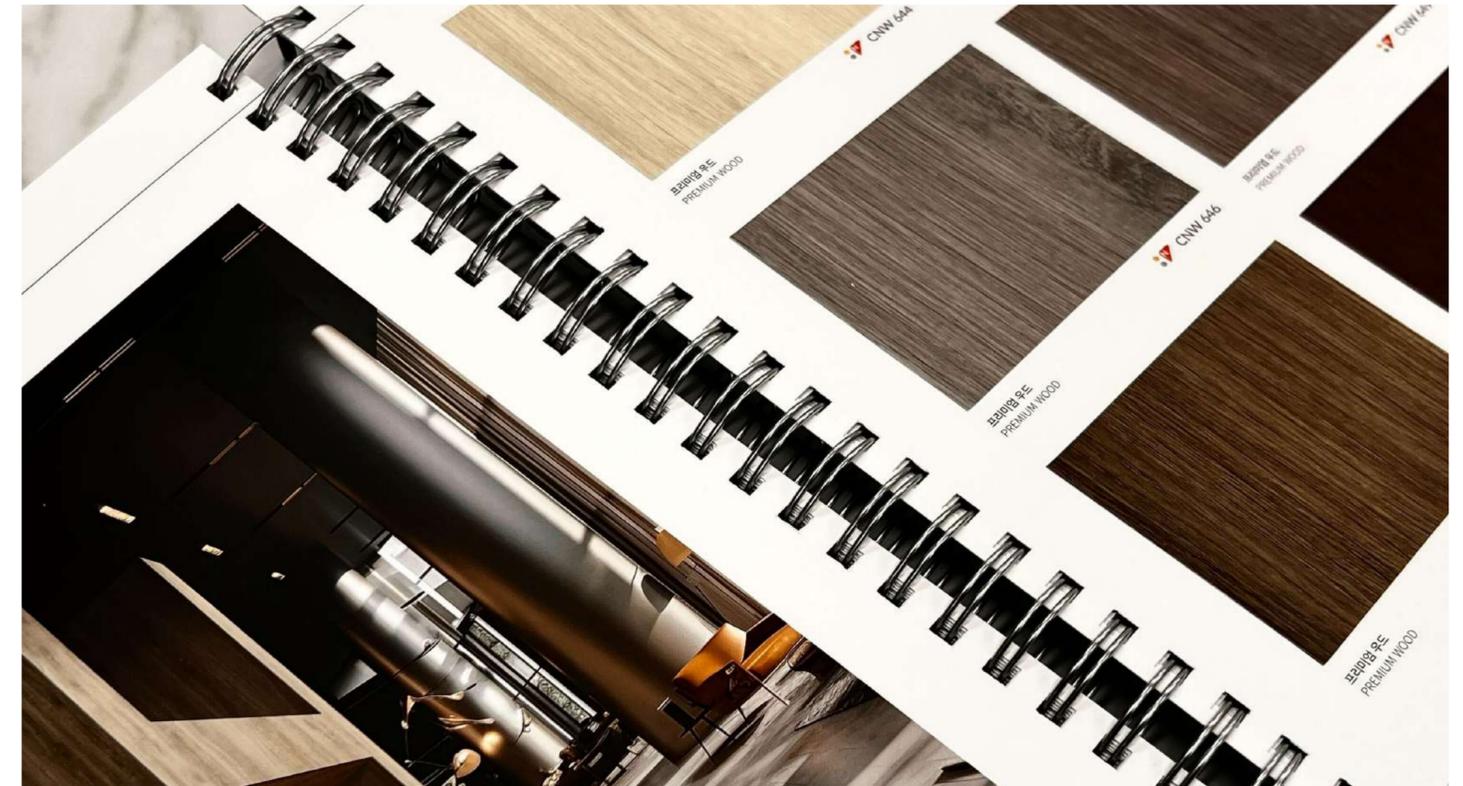

Living in a Material World.

A beautiful selection of styles to give
your old fire doors a new lease of life.

The Range

With hundreds of finishes ranging from natural woods to painted woods, various textures, and flat colors, we have the perfect finish for your project. Kointec architectural fire door wraps are the perfect choice for adding style to your space.

Fancy something off menu?

In addition to our **colour** and **wood** selections, we also stock a range of finishes in **stone**, **fabric**, **leather** and **metal**. Each one of them also complies with the current and upcoming fire safety regulations. [Get in touch to discuss the options >](#)

Now here's the science part.

This section is for the technically minded people in the room.

Here at Orez we like to do things differently. Before we embarked on producing our kaleidoscope of architectural finishes we made the decision to focus on the safety and compliance of the substrate to ensure that our clients received a product which had been tested to all the required legislations. This means you can sit back and relax knowing that every possible question has been answered from a health & safety perspective. To that end we have worked hand in hand with the manufacturers to make sure that no stone (wood, marble, glitter, suede...) was left unturned.

With the arrival of new regulations, fire doors (quite rightly) are under the spotlight and our team of experts are here to help you comply.

Put any questions you have to our team or request more information on the material specification >

Read on to hear how we can help you comply with our fire door audit service

Material Ratings

It's a difficult task to keep up with new or upcoming regulations for managing buildings and the health and safety of your occupants. That's why we've gone to great lengths to ensure all our materials are safe and easy to maintain.

Fire Rated

All our films have been tested to **EN13501-1** and have passed with a classification of **B-S2,D0**.

BS 8214:2016 - Fire door leavers are generally not required to provide a specific surface spread-of-flame barrier, and may therefore be decorated as desired.

Our material is only 400microns thick which makes it fully compliant with **EN 1634 - 1: 2014** which states that decorative products should be no more than 1.5mm thick for use on fire doors.

Eco-Friendly

Our interior film is an environment-friendly surface finish that has passed various tests for emissions of Heavy Metals (Lead, Cadmium, Mercury), Formaldehyde and Total Volatile Organic Compounds (TVOC, Toluene).

Heavy Metals
(<0.5mg/kg)

Formaldehyde
(<0.015mg/m2h)

TVOC
(<0.4mg/m2h)

Toluene
(<0.08mg/m2h)

Hygienic

Our materials inhibit the growth of mould and bacteria making them hygienic and easy to clean and maintain.

Tested with Escherichia coli, Staphylococcus aureus & Klebsiella pneumoniae

Well, that's us from front to back...

If the pretty pictures and products haven't compelled you to throw an enquiry at us then a conversation with one of our lovely human beings might help.
